

USA PAVILION

AGRITECHNICA 2011 • Hall 4, Booth E05
Hanover, Germany • November 15 - 19, 2011

ASSOCIATION OF
EQUIPMENT MANUFACTURERS

Dear Visitors and U.S. companies,

On behalf of the U.S. Embassy in Germany it is my pleasure to welcome you to Agritechnica 2011.

Over 1,000 companies manufacture agricultural equipment in the United States and the industry is a strong global competitor. Large or small, U.S. manufacturers are leaders in this field and we are most proud of the U.S. presence at Agritechnica. Let me extend a personal invitation to all Agritechnica participants to visit our firms — I know that you will find them keenly interested in expanding business and welcoming of your market proposals.

In 2010, the United States exported nearly \$9 billion of agricultural equipment worldwide. Most U.S. agricultural equipment is exported to industrialized market economies, where agriculture is highly capital intensive, reliant on sophisticated technology and integrated into the global economy. Yet I know the global nature of shows such as Agritechnica, and therefore encourage our American firms to consider broadening their market horizons. Now is the time to meet people with outstanding knowledge and expertise who regularly attend Agritechnica – offering our exhibitors direct insights into challenging but rewarding new markets.

To the 46 U.S. companies, including 20 USA Pavilion participants as well as 10 media firms who are participating, congratulations on your part to promote American technology abroad and expand our economy at home. Together we can set the pace for robust growth in the agricultural machinery industry.

I wish all of you much success at Agritechnica.

John Fogarasi

Senior Commercial Officer to Germany
U.S. Commercial Service

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

For more than 50 years, Leland Snow has manufactured standard-setting agricultural aircraft: first the Snow, then the Thrush, and since 1972, the Air Tractor. These planes have shaped the evolution of agricultural aviation. At last count, more than 2000 Snow-designed and manufactured aircraft have rolled off the Olney, Texas assembly line and into the hangars of agricultural operators across the globe.

COMPANY NAME: BRANDT HOLDINGS COMPANY**Contact Name:** Stacy Anthony**Contact's position/title:** General Manager, Int'l Sales**Phone:** +1(308) 760-0274 **Fax:** +1(605) 274-2477**Email:** santhony@brandtholdings.com**Website:** www.brandtholdings.com**Location at Agritechnica:** Hall 4/Booth E05**DESCRIPTION OF PRODUCTS/BUSINESS
AND BRIEF HISTORY**

Brandt Holdings owns and operates 23 John Deere branch offices in the following 5 states of the USA:

North Dakota, South Dakota, Minnesota, Nebraska and California. The export division of Brandt Holdings Company has a fully dedicated staff in place to support the export operations. This would include, export contracts, interpretation and translation, financing, machine disassembly, freight forwarding, spare parts support and machine inspection and repair.

Our Company seriously takes into consideration the level of business that we do in the export market. We practice the same core values in the export market as we do in the U.S., our domestic market, and that is to focus and concentrate on the relationship of our "customers first and foremost!" We have built our company on doing what we say we will do, every single time. We are committed to deliver high quality products and above that, the services and support that are more important, after the sale.

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

iCropTrak for iPad (available in all Apple App Stores) selected as a top 10 featured product at the World Ag Expo

Track crop quality, estimated yield, pests, diseases, farm labor, material and equipment use. Keep a record of any farm related variable (forms and measurements are completely customizable) through a map based visualization. The application uses a forms plus GIS approach. Just tap a location on your map and the data entry form is populated with the selected location data. Incorporate the use of specialized infrared (NDVI) aerial images. Generate GIS reports in the field. No Wi-Fi or cellular data connection needed. Supports multiple users and synchronizes to a central database. Upload maps and custom images and users simply sync to get the latest information delivered to them. New forms are easily added. Manage user roles and access so that content is manageable for each person on your team. Easily adapted to multiple crops and land management functions. This release is a multi-user solution that allows users to capture data and view map reports in the field then synchronize new entries with a central database when they need to. A single user version will be available soon. The product requires a domain key and user account to enable functionality.

COMPANY NAME: Dakota Micro Inc.

Contact Name: Charissa Rubey

Contact's position/title: Vice President Sales & Marketing

Phone: +1 (701) 538 4403 **Fax:** +1 (877) 828 9479

Email: charissa@dakotamicro.com

Website: www.dakotamicro.com

Location at Agritechnica: Hall 4/Booth E05

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Dakota Micro is the exclusive manufacturer of the AgCam and OverView camera systems. The AgCam is the rear view camera that is being partnered with monitors from Trimble, AGCO, AgLeader, TOPCON, John Deere and more. We are proud to have made a name for ourselves in the agricultural market, having been in the industry since 2002.

AgCam Camera

The AgCam camera by Dakota Micro is incredibly easy to install, there are no complicated installation instructions. A single power input adaptor powers the entire system; giving users the ability to mount the cameras and monitor, hook up the cables and power up without any permanent installation required. The cameras are constructed of the highest quality aluminum, milled out of solid aluminum bar stock. The cameras unique sealing mechanism makes them waterproof down to over 250ft of water. The camera also features IR illuminators, wireless transmitter/receiver and on units that can transmit the signal over 6 miles (with line of sight). All equipment has been designed with ease of use and durability as the top priority.

OverView Camera

The OverView backup camera monitoring system is the latest addition to Dakota Micro's full line of products. As our entry level camera system, OverView offers quality construction, versatility and an impressive list of features all with an affordable price tag.

3rd Party Adaptor Cables

Dakota Micro manufactures adaptor cables to input your AgCam or OverView camera into a variety of 3rd party monitors including the John Deere 2630, Trimble FmX & 750, AgLeader Integra and many more.

COMPANY NAME: DOUBLE L

Email: edrake@doublelglobal.com

Website: www.doublelglobal.com

Location at Agritechnica: Hall 4/Booth E05

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Headquartered in the heart of Idaho's potato-growing territory, Double L has been serving the agricultural community for over 40 years. We specialize in engineering and manufacturing customized farm equipment. Double L supplies high quality products at a reasonable price by utilizing the investments in quality people, vendors and machinery. We are committed to delivering exceptional value to the buyers and suppliers we serve. We accomplish this by taking the time to understand our customers' needs, taking a supportive role in the request for quote process. Our equipment is designed with high-tech, yet simple, state-of-the-art features that have proved reliable in every condition. Our planters employ a gravity-fed planter leg system that will work when it is needed most. We constantly innovate our product line with patented features. Everything we manufacture, from our truck beds to our handling equipment, can be custom designed to our client's specific needs.

COMPANY NAME: EBCO**Contact Name:** Bill Bernado**Contact's position/title:** Owner/CEO**Phone:** +1 (847) 531 9500 **Fax:** +1 (847) 364 0364**Email:** bbernardo@ebco-inc.com**Website:** www.ebco-inc.com**Location at Agritechnica:** Hall 4/Booth E05**DESCRIPTION OF PRODUCTS/BUSINESS
AND BRIEF HISTORY*****Vibration Mounts***

Ebco offers a wide range of standard engineered vibration mounts for all types of industrial applications. Our existing selection is the widest in the industry today. Modifications to an existing mount can be performed quickly and easily if required. For unique situations where a special solution is needed, our engineering team will develop a custom product for you. Ebco has the tools to perform on-site data acquisition for input into our virtual dynamic optimization software systems. With decades of combined experience in OEM applications, our engineering department has the tools and background to provide world-class solutions for your needs at affordable prices.

***Extruded Seals***

Ebco offers an extensive library of extruded seal profiles for your application. If a custom profile is required, our engineers can easily design an alternative solution at a minimal cost. Corners and seams are molded to provide excellent pull strength at the bond. Ebco can provide profiles with flocking, slip seal coating, pressure sensitive adhesive (PSA), HAT adhesive, plastic insert attachment systems and adhesive in the U channel for superior strength.

COMPANY NAME: GREAT PLAINS MFG, INC.

Contact Name: Doug Burgardt

Website: www.greatplainsmfg.com

Location at Agritechnica: Hall 12/Booth B04

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Founded in 1976 with the production of just one model, Great Plains Manufacturing, Inc. is now North America's largest family owned and operated producer of agricultural implements. Great Plains delights our customers by providing an innovative range of cultivation, planting and seeding equipment.

The company's range and international presence was enhanced in 2010 with the purchase of Simba International, the UK's leading cultivation equipment manufacturer. In addition to the new office and manufacturing facilities in the UK, Great Plains has subsidiary offices in Russia, Ukraine and East Europe.

An impressive array of seed drills, stubble cultivators, subsoilers, vertical tillage, planters and presses is supplemented by products of the Great Plains Land Pride Division. The Land Pride product mix includes finish mowers, rotary tillers, rotary cutters, landscape seeding equipment, zero-turn mowers, and a number of dirt-working implements.

Quality product moving quality product

**DESCRIPTION OF PRODUCTS/BUSINESS
AND BRIEF HISTORY**

In 2000, the founders of KSi Conveyors Inc. developed a patented, cleated belt technology that outperformed conventional augers and conveyors, moving seed at steeper angles and – most importantly – with very little damage to the seed. This technology and focus on seed quality has helped KSi establish a reputation within the industry as the standard for high-quality conveyors and seed handling equipment. Our goal was to design a conveyor that would outperform conventional augers and conveyors in terms of material flow speed, maximum degree of operation, and have better material handling.

We accomplished this goal with the use of the patented cleated belt that moves seed more efficiently than conventional augers, has the ability to perform at an angle up to 40 degrees and can handle material more gently, resulting in very little material damage. This reputation led to the development and design of Bulk Seed Site conveyors and related equipment. KSi developed standards and procedures early on for managing the process of Bulk Seed Site installation, and we have used that process to implement Bulk Seed Sites all over the country. Our Bulk Site Specialists offer customers a single-source solution for the purchase, installation and training of all equipment required for a Bulk Seed Site, and then manage the process from beginning to end to ensure customer satisfaction.

COMPANY NAME: LEGACY STEEL BUILDINGS

Contact Name: Bruce Engkjer

Contact's position/title: Owner

Phone: +1 (701) 237 9620

Email: bruce@legacysteelbuilding.com

Location at Agritechnica: Hall 4/Booth E05

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Reinke Manufacturing Company, Inc. is one of the world's largest manufacturers of center pivot and lateral move irrigation systems. A builder of top-quality, reliable irrigation systems, Reinke Manufacturing Company, Inc. continues to gain recognition for engineering advances that have become the industry standard. Reinke manufactures a full line of center pivot, lateral move, towable and corner mechanical move systems. In addition, Reinke provides a full complement of high tech water management tools for farm, industrial and waste water applications. Reinke systems are built to last and to operate reliably for many years, requiring little maintenance and providing maximum efficiency. With many choices of span and water pipe options, Reinke systems can be customised for almost any farm and water conditions. Crop applications: Grain crops, vegetables, sugar cane, tobacco.

COMPANY NAME: SCAFCO GRAIN SYSTEMS CO.

Contact Name: Anthonio Pinheiro

Contact's position/title: Market Research Analyst

Phone: +1 (509) 535-1571

Email: anthoniopinho@scafco.com

Website: www.scafco.com

Location at Agritechnica: Hall 6/Booth D51

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

SCAFCO Grain Systems has been manufacturing and designing complete grain storage silo projects for over 50 years and has grain storage silos installed in over 79 countries worldwide. We offer a complete line of commercial and farm silos, hopper bottom silos, grain aeration and drying systems, conveyor and elevator equipment and other accessories to meet your grain storage needs. SCAFCO's grain storage silos range in size from 21 to more than 32,000 tones, and its hopper silos range from 3 to more than 1,500 tones. SCAFCO silos are engineered to withstand climatic and seismic forces, ensuring safe, reliable, and long lasting grain storage for years to come.

COMPANY NAME: Sioux Steel Company

Contact Name: Deon Carriere

Contact's position/title: Sales Manager

Phone: +1 (800) 557 4689 Fax: +1 (605) 357 8597

Email: info@siouxsteel.com

Website: www.siuuxsteel.com

Location at Agritechnica: Hall 4/Booth E05

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Established in 1918 and founded by Charles Rysdon, Sioux Steel Company is currently in its 4th generation of family ownership. Sioux Steel is a leading manufacturer of high-quality products for the agricultural industry. Chief Executive Officer, Scott Rysdon's motto is, "We don't just want our customers to be satisfied.... We want them to be **DELIGHTED** to do business with us."

Sioux Steel Company offers a variety of grain storage solutions. Sioux Steel is known in the marketplace for the strongest farm grain bins/silos and the only manufacturer to offer a 10 year warranty on farm bins/silos. Commercial bins/silos and ProTec buildings are used to store sizeable quantities of grain for large producers, cooperatives, grain elevators or any type of business that stores substantial quantities of grain. ProTec Buildings have tough, tightly woven polyethylene fabric covers that allow for unmatched natural lighting.

One of Sioux Steel Company's divisions, Koyker Manufacturing Inc., manufactures the FlexStor Grain Bagger and Grain Unloader, which provides flexible grain storage at a lower investment vs. metal or concrete structures. By using high-quality polyethylene storage bags, you can store grain at any location and unload it at your convenience. The FlexStor Grain Bagger and Unloader provide producers a lowcost, flexible solution for grain storage needs. Sioux Steel Company is known for providing customers with the very best service and please use the above contact information or contact them directly by phone at (605)-336-1750.

Phone: +1 (509) 665 0176 **Fax:** +1 (509) 662 1661
Email: jgm@sfequip.com
Website: www.sfequip.com
Location at Agritechnica: Hall 4/Booth E05

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Superior Fruit Equipment is the manufacturer of Hickok Pruning Loppers, VACA Pruning Shears and Wells & Wade Picking Bags and Buckets. Manufactured in the USA since the 1920's, our products continue to be the #1 choice for the professional fruit industry around the world. Located in the heart of the fruit growing region in the State of Washington, we are able to get immediate feedback on our products from the professionals that use them. We pride ourselves on manufacturing the highest quality products to meet the demands of professionals that use them.

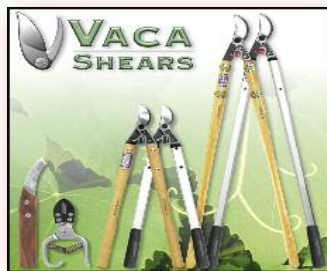

Hickok Pruning Loppers

Top-quality materials and craftsmanship of Hickok Loppers make them a very popular choice for the professional orchard and vineyard pruner. All models and sizes are available with either aluminum or hickory handles. Today's parts still fit our loppers from 1991.

VACA Shears

The VACA 49 Series Professional Tree Loppers are great for orchard pruning. We offer both the "Aircraft Grade" aluminum handles and Tennessee Hickory handles on all models.

Wells & Wade Harvest Equipment

Wells & Wade Picking Bags and Buckets are manufactured to last for many harvest seasons. We make several different styles for picking a variety of fruits and vegetables.

TITAN

MACHINERY

DESCRIPTION OF PRODUCTS/BUSINESS AND BRIEF HISTORY

Titan Machinery represents the largest network of agricultural and construction equipment stores in the upper Midwest, USA and the largest Case IH dealer in the world. Titan Machinery, established in 1778, went public in 2007 and now owns 87 dealerships, with annual sales of \$81.09 billion. With over \$400 million invested in quality equipment and \$65 million in parts, Titan Machinery has extensive experience of exporting all over the world a dedicated staff of international equipment logistics and a strong working relationship with the ExIm bank.

Quality Used Agricultural Equipment

Titan Machinery offers the largest selection of quality used agricultural equipment of all renowned manufacturers with very low hours and all with service records.

Quality Used Construction Equipment

Titan Machinery is a large distributor of world-known brands and we have a large stock of new and used quality equipment including wheel loaders, excavators, loader backhoes, cranes, forklifts, skid steers, etc. Rental or lease return machinery with low hours is very popular with off-shore customers.

New equipment of specialized manufacturers

Titan Machinery offers a large variety of new specialized Agricultural equipment such as Gates heavy harrows, McFarlane spike-tooth harrows, Salford disk harrows, Top Air pull-type sprayers, EZ Trail grain carts, Balzer shredders, Parker header trailers, etc. as a perfect addition to tractors and combines of earlier mentioned brands.

Cutting parts & wear resistant technologies for the agriculture, biofuels and forestry markets

The US Commercial Service provides US companies direct market access into any country in the world. As a division of the US Department of Commerce's International Trade Administration, we have a network of trade specialists covering every US state and with offices in Embassies and Consulates in over 80 countries around the world, all working on behalf of US companies wanting to sell their products and services overseas. Our assistance speeds market entry and minimizes expense for US companies. We can help US companies identify viable overseas distribution partners, research market opportunities in any country in the world, and be a guide in business expansion worldwide. We also assist US companies in addressing investment and market barriers. The US Commercial Service co-organized the USA Pavilion at Agritechnica along with partner AEM (Association of Equipment Manufacturers).
